Priority Justification and State Comments Regarding:

X PA SI Follow-up SI RPS HRS

Due to the age of the facility, disposal on-site of wastes is possible.
The age of the facility may be approximately 80 years. Paper coating, ther-
mostat manufacturing and a foundry have operated here.

The present company has had problems with metals to the city water treat-
ment plant over the years.

The State recommends a low priority site inspection to include soil/
shallow core sampling and sampling of the sewer discharge.
